

Your Staples program delivered at home

Keep your teams connected and productive wherever they work.

Receive your custom pricing and program for delivery in the office or at home. To provide you with reporting and the ability to control spend, associates will need to register for home deliveries in addition to their existing program access.

Set up a Staples home delivery program with two easy options:

- Provide Staples with a list of your associates and their home addresses for us to set up
- We will provide you an email that has a unique registration link for you to send to your associates to self-register for a login

How the program works:

- Payment is credit card only – either at the account or user level
- Associates will need to register for your home delivery program with a new unique USER ID and password
- Existing USER IDs and passwords will remain in place for office deliveries
- Easy online ordering
- Free delivery with no order minimums

Get started in setting up a home delivery program today!
